

Our **R&D-cum-Innovation Centre** actively cultivates a research-oriented environment by encouraging students and faculty to explore new ideas and creative solutions. The Centre regularly conducts meetings with various clubs and societies to gather innovative suggestions and develop collaborative projects. To document and celebrate these initiatives, a bi-annual E-Newsletter is published, featuring major activities, achievements, workshops, events, and innovation-driven efforts across the college. This continuous engagement strengthens our culture of creativity, inquiry, and academic excellence.
